### Elite Core Technologies ties up with BroVis

By VARIndia Correspondent

Elitecore Technologies' product 24online, which is a leading billing & bandwidth management solution, joins hands with Bro Vis to offer complete Billing and Network management solution catering to the growing market demand. 24online offers its solution to WiMax and Wi-Fi service providers, Broadband and dial up service providers, hotels, hotspots and cafes. It provides time and usage based internet access and to manage subscribers and franchisees.

BroVis ("Broadband Vision") Wireless Networks is a next generation Broadband Wireless Infrastructure Systems Manufacturer providing complete infrastructure solutions for Service Providers and Enterprises globally using WiMAX (802.16e) and WiFi (802.11 a/b/g/n) standards.

According to Nikhil Jain, COO and Director, Elitecore, "Network Management Solutions from BroVis would prove to be a complementary component for the overall solution. It will be particularly prominent in Wi-Fi and Hotspot segments." He further adds, "By integrating the NMS, we would be in a position to provide single interface for hospitality admin, subscribers' management, billing, Wi-Fi and network management."

Excited about the symbiotic tie-up Muthu Logan, CEO, BroVis said, "Getting associated with a reputed brand as this would take us a long way. Moreover, the tie-up will help BroVis in expanding their service offerings and will lay a solid foundation for 24online by leveraging the well established networking facilities." He further added, "We would have an opportunity of vertical integration, by providing Billing and Bandwidth Management solutions apart from serving strong wireless connectivity appliances, which has been a part of our forte prior to the tie-up."
